

AQUAPRO 2120 Water based & DURASTAIN 2025 Solvent Based Stains

AQUAPRO 2120 is a water based dye stain designed to achieve consistent colour with excellent clarity. DURASTAIN 2025 is an easy to use, solvent based dye stain designed to accentuate the grain with excellent clarity. Both stains are available in 8 bright vibrant colours which can be blended to promote an unlimited colour range.

Black

Maple

Oak

Teak

Walnut

Red

Blue

Yellow

The colours shown on this palette are to be used as a guide only. Actual colours will vary due to computer monitor displays and how individuals see colour. The final appearance of the stain is affected by many factors including timber colour species and number of coats of the stain. (Higher number of coats results in darker colour). It is up to the user to test and confirm the colour on a sample board before application. This colour chart should be used as an indicative guide of colour only. This Stain Guide is based on information in Mirotone's possession at the "date of issue". Amendments to the Stain Guide can be made at any time. Users should check that this Stain Guide is still current before applying coatings as per the information contained within.
