

BW 184 Vel

Stable, velour-backed abrasive paper with zirconia alumina grain

Product Benefits

- Tough zirconia alumina abrasive grain means high stock removal rates
- Very high edge stability by extremely robust paper backing increases the economic efficiency
- Better performance compared with conventional discs

Applications

- Repair sanding of parquet floor
- Sanding and deburring of plastic and glass fibre parts for the automotive industry
- Sanding and deburring of blades for wind power stations made of glass fibre
- Rough grinding of steel and stainless steel (e.g. weldings)

Product Structure

Type	18407
Grain	Zirconia alumina
Bonding	Resin
Backing	G-weight paper, velour-backed
Coating	semi-open
Grit range	+ 24, + 36 - + 40, + 60 - + 150

Forms of Delivery

Discs

Metal

Wood

Lacquer

Composite

Glass and Ceramics

Stone

- Very suitable
- Suitable
- Not suitable
