LITRE SIZES

Suitable for exterior timber including decking, pergolas, garden furniture, fences, gates, weather boards, trims and soffits.

Prepares new and unseasoned timber for coating or removes old oil coatings.

Removes tannins, mill glaze and oils to prepare new timber for coating, or removing old oil coatings from existing timber. Not suitable for stripping paint or poly-urethane film coatings from timber.

Follow up with Equisol Vitalise to neutralise and brighten timber, ready for coating.

Brightens and cleans exterior timber before first coat or recoating.

Removes dirt, surface contaminants, grease, rust, iron stains, water stains and old colour tones from existing oiled timber. Rejuvenates grey and weathered timber.

Use to prepare exterior timber for recoat.

Follow it up with Equisol ProE365 Advanced Timber Stabilising Oil
