

FILLER GEL

A spirit-based gel filler formulated to fill gaps, cracks and joints prior to sanding and finishing. Excellent filling and adhesion properties, whilst offering specific colour matching when mixed with fine saw dust directly from substrate.

Ideal for use under Fiddes Hard Wax Oil, Clear Glaze and Premier Wood Varnish.

Application

Sand wood substrate, collecting resulting clean powder/dust and mix with Filler Gel to form a smooth paste. Fill joint/gap to maximum and allow to dry completely for 30-60 minutes. Proceed with final sanding of substrate to required level.

Always apply in dry, non humid conditions, at room temperature. Clean applicators with Acetone.

Sizes: 800g & 5lt

*Please note: Coverage varies between 10 to 30sqm/lt, depending on substrate, size of gaps to be filled and volume of sawdust added to the Filler Gel. Coverage can also be affected by application method, eg. Trowel filling entire surface will use more product than filling individual nail holes or cracks.
